

**SHREDZILLA™**

THE PERFECT BLADE FOR EXTREME,  
HIGH WEAR SHREDDING APPLICATIONS

WOOD

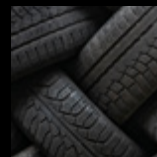

CARPET

PLASTIC

PAPER

TIRE

Zenith Cutter, a leading manufacturer of industrial knives and blades, offers the Shredzilla, a carbide-capped block, for use in all 40mm shredders. This patented product has many benefits over solid carbide cutters, solid steel knives and carbide insert knives.

# SHREDZILLA™

## ADVANTAGES OVER SOLID CARBIDE CUTTERS

- same life at a nearly **30% lower cost**
- Increased cutter efficiency from positive geometry with no drag or interference.
- Lower maintenance expense from the brazed structure and the elimination of equipment damage in the event of a failure

## ADVANTAGES OVER STEEL KNIVES

- Lasts up to 10 times longer (based on customer experience in carpet applications)
- Up to 80% less downtime due to less frequent blade changes required

## ADVANTAGES OVER CARBIDE INSERT KNIVES

- Improved cutter efficiency and reduces wear for increased material throughout because of the continuous carbide surface.
- 4 cutting edges for maximum life

Part No.	Description	Thread	Applications
K821203Z46-B	40 mm Carbide-capped shredder, general purpose, crowned	M12 x 1.75	<b>Plastic:</b> All Plastic 1-6; PET, HDPE, PVC, LDPE, PD and PS; CARPET; <b>Paper:</b> General Paper Waste, Envelopes, Newsprint, Magazines; <b>Rubber:</b> Thinwall Rubber, Flooring, Mats, Innertubes, Rubber Bands, O-Rings; <b>Wood:</b> Clean Pallets, Timber Processing, Trees, Furniture
